

Summary Report for SQL and Data Querying on Chinook Database (Music Store Data) and Sales Dataset (Adventureworks Lite / Equivalent)

1.1 Project Objectives: To develop strong SQL Querying skills through:

- Enhancing and transforming structured data
- Writing efficient queries
- Solving business-driven analytical questions

1.2 Business Questions

To make data-driven decision-making, there are business questions to ask and business problems to solve to get insights. The business questions for this project are:

- What are the top performing products or customers?
- What are the revenue trends over time?
- What is the customer purchasing behavior?

1.3 Key Metrics

The key metrics from the project analysis are;

1.3.1 Sales Revenue Trends (sales_sample_data.csv)

Month	Year	Revenue	Total Order
November	2004	\$1038709.19	31
November	2003	\$1029837.66	28
December	2005	\$372802.66	11

1.3.2 Top Performing Customers (sales_sample_data.csv)

Product	Customer Name	Total Sales
Classic Cars	Euro Shopping Channel	393760.92
Motocycles	Daedalus Designs Imports	61495.37
Planes	Rovlli Gifts	67756.64
Ships	Euro Shopping Channel	44306.1
Train	Euro Shopping Channel	37854.06
Buses	Mini Gifts Distributors Ltd	124434.52
Vintage	Mini Gifts Distributors Ltd	161706.05

1.3.3 Top Performing Products (chinook_database)

Genre	Total Revenue	Track Sold
Rock	\$826.65	835
Latin	\$382.14	386
Metal	\$261.36	264
Alternative & Punk	\$241.56	244
TV	\$93.53	47

1.3.4 Top Purchasing Customer (chinook_database)

First Name	Last Name	Total Spent
Helena	Holy	\$49.62
Richard	Cunning	\$47.62
Luis	Rojas	\$46.62
Huge	O'Reilly	\$45.62
Ladislav	Kovács	\$45.62
Julia	Barnett	\$43.62
Fuyn	Zimmerman	\$43.62
Frank	Ralston	\$43.62
Victor	Stevens	\$42.62
Astrid	Gruber	\$42.62

1.5 Insights and Recommendations

Key insights and recommendations for shareholders feedback are:

Dataset / Database	Insights	Recommendations
sales_sample_data	The data reveals massive revenue spikes in November for both recorded years. November 2004 generated the highest revenue of about \$1,038,709 across 31 orders closely followed by November 2003 which brought in \$1,029,837.66 across 28 orders.	The insights indicate a highly seasonal business heavily reliant on end-of-year holiday shopping. The company should ensure inventory, supply chain logistics, and marketing efforts are aggressively ramped up by September to support the immense volume that hits in November.
chinook_database	“Rock” is the undisputed top-performing genre, generating \$826.65 from 835 track sales. It single-handedly brings more than double the revenue of the second-highest genre (“Latin”, which revenue is \$382.14).	The music store’s core customer base has a strong preference for Rock, Metal, and Alternative & Punk. Marketing budgets and catalog acquisition strategies should lean heavily on expanding these specific genres to maximize return on investment.
chinook_database	The average lifetime spend across all customers in the database is roughly \$39.47. Out of 59 total customers, 22 of them (about 37%) spend more than the overall average. The top-spending customer, Helena Holý, has a lifetime spend of \$49.62.	These 22 “above-average” customers represent the store’s most valuable segment. The business should consider implementing a VIP loyalty program or sending targeted promotional campaigns to this specific group to encourage repeat purchases and retain their high value.
